Product descriptions

Tagline copy

Ignite Pro gives you 190 plugins (565+ effects & presets) to fire up your editor of choice. Providing you with powerful HitFilm technology at your fingertips, enhancing your toolkit.

Short copy

Ignite Pro enhances the abilities of editors like Adobe Premiere Pro CC, Final Cut Pro X, and DaVinci Resolve; upgrading them with powerful visual effects toolkits.

Advanced HitFilm technology can now benefit the workflow of editors whenever they need it. This massive set of powerful plugins is available to you on Mac and PC and is compatible with 10 of the most popular host software. Delve into the world of 360° video with a huge range of advanced 360° enhancements, grade like a pro with the inbuilt color grading tools, simulate rain or fire with a powerful particle simulator, and use the powerful Puppet tools to quickly add natural motion to raster images and vector graphics, including still images, shapes, and text characters.

Features

Wherever, whenever: Ignite fits into any workflow. Install the plugins on Mac or PC, to all hosts and enjoy powerful HitFilm technology, enhancing your creativity. No arbitrary restrictions.

Scratching the Surface: We've taken Andrew Kramer's (Video Copilot) astonishing Damage & Decay and Cinematic Title tutorials and made them easier to create. What used to take hours can now be done in minutes!

Advanced 360: Immerse yourself into 360° video with 20 powerful 360° video plugin tools including animated lasers and lightswords.

Puppetmaster: Use the Puppet tools to quickly add natural motion to raster images and vector graphics, including still images, shapes, and text characters.

Tantalizing text: Providing a fast method to create text on your editor timeline, without having to create a composite shot. The advanced text features the ability to quickly justify the text, offset text from the corners of the video, and change the font and text size with ease.

All major hosts: Supported by Premiere Pro, After Effects, Final Cut Pro X, Motion, DaVinci Resolve, Catalyst, Vegas Pro, NUKE, EDIUS, and Avid Media Composer.

Professional keying: The best chroma key in the business, with project-saving spill replacement for 100% realistic composites.

Atomic particles: Form-based particle system with fractal and audio-driven animation.

Light flares: The ultimate lens flare collection with streaks, highlights, leaks, artificial lens dirt and anamorphic artefacts.

Colorist's toolkit: Expand your color correction and grading potential.

Complete list of included plugins:

Not all effects are available to all hosts. Please refer to the [Ignite site](#) for more details.
